BTE 32323: Project Management

Level: 3000

Number of Credits : 03

Course Description

Project management is a strategic discipline designed for the effective execution of unique and complex activities. It discusses how projects are designed, implemented, and terminated effectively while minimizing project failures. Further, it focuses on how to address the issues through proper planning, scheduling, and controlling projects.

Intended Learning Outcomes

At the end of the course, the student will be able to;

- Explain concepts, tools, and techniques in project management.
- Design projects and prepare project plans,
- Apply project management tools and techniques in managing projects.
- Evaluate project performance and address the issues leading to project failures.
- Use computer applications in project management.
